

Raswanth CB

Technical Solutions Consultant - Enterprise AI Solutions

Bengaluru, India | +91 6382390219 | raswanthcb01@gmail.com | linkedin.com/in/raswanth-cb
Nationality: Indian | Open to international relocation | Requires work-visa sponsorship

SUMMARY

Technical Solutions Consultant at a Phison joint venture, delivering enterprise AI and storage solutions on an LLM-based hardware-software platform with RAG and fine-tuning - 80+ PoC engagements at a 60% qualification rate and 6 enterprise deals closed at up to US\$1M. Trusted advisor to CXO and partner stakeholders; currently prototyping an LLM-powered enterprise software and hardware stack.

SKILLS

Solution Engineering: Solution Architecture & Design, Technical Discovery, Proof-of-Concept (PoC) Delivery, RFP/RFI Responses, Implementation Reviews, Technical Documentation, Stakeholder & CXO Management, Technical Objection Handling, Sales Enablement
Programming & Data: Python, SQL, Java, REST API Integration, System Design, Data Analysis, Root Cause Analysis, Prompt engineering, Workflow Automation, Cloud (GCP)& On-Prem Hybrid Architectures
Platforms & Tools: HubSpot CRM, Power BI, Tableau, Jira, Confluence, Conversational AI platform, Agentic AI

EXPERIENCE

Solutions Consultant & Pre-Sales Engineer Nov 2024 - Present
MiPhi Semiconductors - a Phison Joint Venture Bengaluru, India

- Scaled pre-sales technical engagement across **80+ proof-of-concept** engagements roughly 70% on enterprise AI solutions and 30% on storage - with a 60% qualification rate, converting 10 into technical wins and contributing to a **25% uplift in partner-driven pipeline**.
- Led the solution architecture and technical design of an LLM-powered software and hardware platform built on a conversational AI platform, enabling enterprise users to query and surface internal knowledge, collaborating within a 6-member cross-functional team.
- Orchestrated end-to-end workflows on Phison's conversational AI hardware-software solution for qualified opportunities, enabling customer PoCs and validating technical feasibility using customer data and real-world use cases prior to commercial commitment.
- Served as trusted technical advisor across **10+ enterprise accounts** spanning five customer types (OEMs, SIs, distributors, cloud providers) - drove discovery-to-technical-win on each by removing technical objections and running product demonstrations and PoCs.
- Closed **6 enterprise deals** valued at up to **US\$1M** each by coordinating Sales, Engineering, Product and Manufacturing across the full deal cycle.
- Architected and presented an enterprise server-infrastructure solution for a government telecom RFP/RFQ, producing the technical proposal and solution documentation and aligning cross-functional stakeholders.
- Advocated partner feedback to Product and Engineering, shaping 3 product improvements and reducing solution-design rework by 20% across 3 enterprise accounts by validating feasibility with Engineering before commitment.
- Built automated HubSpot CRM workflows and Power BI dashboards, increasing pipeline visibility by 40% and enabling weekly executive forecast reviews; created technical enablement resources on technical positioning and objection handling.

AI Developer Intern Jan 2024 - Jun 2024
Tata Institute of Social Sciences Hyderabad, India

- Improved model accuracy by 18% on a 40 GB geospatial deep-learning task by re-engineering the PyTorch preprocessing pipeline, tuning hyperparameters and defining a held-out evaluation set to prevent regression.

AI Automation Intern Jul 2023 - Aug 2023
KGISL Coimbatore, India

- Developed and deployed an automated web-scraping and analytics pipeline in Python, reducing manual data collection by 70% and accelerating delivery of production insights.

PROJECTS

- **Autonomous Driving - CNN & Reinforcement Learning:** learning pipeline combining multi-camera vision, LiDAR and NLP (Natural Language Processing) based scene understanding for real-time object detection and RL-driven path planning; benchmarked and validated in the CARLA simulator.
- **Infringement Tracking System (Java):** Built a plagiarism and AI-content detection system for online examinations; deployed institution-wide, reducing manual review effort by 60%.

EDUCATION & CERTIFICATION

CHRIST (Deemed to be University) - MSc, Data Science 2022 - 2024
Sri Krishna Adithya College of Arts and Science - BSc, Information Technology 2019 - 2022
Microsoft Certified: Azure Solutions Architect Expert (AZ-305)
